

GEORGE G.
GLENNER
ALZHEIMER'S FAMILY CENTERS, INC.®

ESTABLISHED 1982

OUR HISTORY

Our legacy begins with our founders, Dr. George G. Glenner and his wife, Joy. Dr. Glenner was a physician and Alzheimer's researcher at the UCSD School of Medicine and worked tirelessly to better understand the pathology of the disease. He became world-renowned for his research and identification of the beta-amyloid protein.

While his discoveries and explorations helped to advance our knowledge, the concern for the families affected by Alzheimer's provided the poignant foundation for our centers. The Glenners were very concerned with the enormous stress the disease puts on caregivers. They saw the day-to-day struggles of families desperate for help. Their passion and determination to help these families is what defines us today.
