

OUR HISTORY

Our legacy begins with our founders, Dr. George G. Glenner & his wife, Joy. Dr. Glenner was a physician & Alzheimer's researcher at the UCSD School of Medicine & worked tirelessly to better understand the pathology of the disease.

He became world-renowned for his research & identification of the beta-amyloid protein. While his discoveries & explorations helped to advance our knowledge, the concern for the families affected by Alzheimer's provided the poignant foundation for our centers. The Glenners were very concerned with the enormous stress the disease puts on caregivers. They saw the day-to-day struggles of families desperate for help. Their passion & determination to help these families is what defines us today.
