Town Square® is a registered trademark of the George G. Glenner Alzheimer's Family Center, Inc.®. All rights reserved.

In 1982, Dr. George G. Glenner and Joy Glenner created the nation's first non-profit medical/social adult day healthcare program designed specifically for individuals with Alzheimer's disease and dementia.

Now, with another "first-of-its-kind", we proudly introduce Town Square®, a highly-structured, safe and fulfilling experience filled with tangible prompts from the past.

## Reminiscence Therapy

provides benefit to those with Alzheimer's and other forms of dementia by surrounding them with tangible prompts from their past bringing them back in time to

where their memories are the strongest. Reminiscence Therapy has been shown to improve mood, reduce agitation and improve sleep quality.
